Softuff. Ball Peen exclusive features

- One piece uni-cast Compothane throat and handle with safety grip and flanged butt.
- Handle will not break as a result of overstriking the target. Exclusive built in design allows for straightening of extreme overstrike.
- Compothane handle butt may be used as striking device when desired. Eliminates wood splintering and chip contamination.
- Contour of Compothane core in head allows hammer to be placed on any surface without risk of marking or damaging its finish.
- Dead blow heads are non-bounce for maximum striking force.
- Finest precision tempered steel faces with beveled crown.
- Covered by U.S. Patent 4,039,012.

The World's Largest Manufacturer of One Piece Uni-Cast Hammers

"SAFETY IS NOT A FACTOR BU

Softuff® HAMMERS

The hand tool that's

"NO MARK - NO SPARK"

from handle to head

ALL PURPOSE-HIGH PERFORMANCE

The exclusive design found only in Softuff hammers, covered by U.S. Patent 3,844,321, has revolutionized the soft face hammer field. They are the most sophisticated, durable, high performance, multi-purpose hammer on the market today.

One piece uni-cast construction completely eliminates the age old problems of splintered handles, mushrooming, absorption of liquids, contamination and chip pick-up in faces.

NO Tool Box or Workshop is complete without one!

els with dead blow heads

a wide span of maximum hand tool tasks up to a new n striking force. Face diameters from 2¾'' to 3½'', overall 20'' to 36'', weights from 7 to 14 pounds. They are molded ane.

Compo-Cast Products are Researched and Designed with People in Mind

T THE PRIME CONSIDERATION"

Softuff® HAMMERS

represent a major breakthrough in design and concept

WILLIAM H. COOK
President

Civilization has seen little change in the basic structural concept of the hammer since the Roman empire.

Compo-Cast's development of one piece uni-cast construction has introduced a new dimension in performance to meet the demands of today's safety oriented society and its needs.

Along with setting a new standard for excellence in soft faced hammers, Compo-Cast's ball peen model with dead blow heads are another first in their field.

The acceptance and use of these hammers by practically every segment of industry has firmly established Compo-Cast as a new leader in today's hand tool market.

Compothane hammers are available at leading hardware and automotive dealers throughout the U.S.A.

Under a licensing agreement with Urethane Products Canada Ltd. Softuff hammers are being manufactured and distributed throughout the world.

Compo-Cast research is dedicated to a continuing program of developing better ways, through better products, to solve the needs of tomorrow.
